New Concept

SHEMA97

Functional Active Mask

The Shema97 functional active mask uses high-performance nano fabrics technology to protect respiratory systems from harmful substances such as yellow dust, fine dust and infectious sources!

- Micro nano textile filters 97.1% dust particles
- Able to freely breathe without suffering from stifling when you wear a mask
- Easily adjust the length of straps to fit to face with a sturdy toggle and lanyard
- Applied functional nose support to protect from external toxic substances
- Light weight: only 6 grams, which means much less pressure for the ears
- Cooling function allows good air circulation
- Excellent Sound Transmission
- Hand-washable for more than 20 times
- FDA Approved

SHEMA97

1 PCS

SHEMA97

Functional active mask using high-performance nano fabric technology to protect respiratory system from harmful substances

PRODUCT CHARACTERISTICS

The micro dustproof fabric, developed by our own technology, is used to prevent the inhalation of fine dust and dust into the air and to make sure that the air is well ventilated.

Comfortable breathing

Physical particle blocking

Capable of supporting the nose

Easy portability fold-designed

Protection against UV

PRODUCT CHARACTERISTICS

1

Make sure that the area in contact with the respiratory tract is not contaminated.

2

Hold the nose support and wear it to cover your nose and mouth.

3

Attach the strap to the ear and fix the position of the mask using a stopper.

4

Attach the mask closely to prevent any gaps.

PRECAUTIONS FOR USE

- Do not use in a closed area with an oxygen content of less than 1%.
- Do not use it with your mouth and nose closed with tissue or towel.
- If the inside of the mask is contaminated, wash it before using it.
- Clean with running water. And use it dry.
- Do not apply any physical force to the mask.
- Stop using the mask if breathing is uncomfortable. And consult with the medical staff.
